

FUNDING PROPOSAL

PREPARED BY
Founder

NFToa
From Indonesia

DATE: 29 Oct 2025

Development Support & App Store Publication

Applicant: NFToa

Website: <https://nftoa.com>

Addressed to: GNC eCash

Date: 29 Oct 2025

Requested Amount: USD 198 (Apple Developer Program annual fee for two years)

Additional Support: Optional appreciation for NFToa's contribution to the eCash ecosystem

Abstract

Most free applications in the market still suffer from fundamental issues: poor interface design, slow performance, and intrusive ads that disrupt user experience.

Recognizing this gap, NFToa was founded with a vision to deliver **ad-free, fast, and cleanly designed applications** that remain accessible to everyone.

However, NFToa's mission goes beyond user experience. We introduce the concept of **NFT Open Access** — turning NFTs from mere collectibles into **functional access tools for real applications**. Each NFT in the NFToa system acts as a “key” that unlocks features or applications within the Gaexe ecosystem, including Gaudio, the first flagship app under this mission.

Funding Purpose

The requested **USD 198** will be used to cover:

- **Apple Developer Program annual fee for two years**
- Distribution and publication process of NFToa & Gaudio on the App Store
- Application notarization, testing, and maintenance to comply with Apple's policies.

With this support, iOS users will enjoy NFToa and Gaudio applications that are:

- **Ad-free and user-friendly**
- Integrated with an **NFT-based access system**
- A natural entry point for new users to discover **eCash**.

NFToa Strategy & Mission

NFToa introduces eCash not through theory or crypto education, but through **real, tangible experiences that benefit everyday users.**

Strategic Steps:

- **Release simple yet meaningful apps**, with superior UI/UX compared to typical free alternatives
- **Provide free NFT giveaways** to new users who have never heard of eCash, guiding them to create wallets via **cashtab.com**
- Each NFT serves as an **access key (NFToa Access)** to applications like Gaudio, and future ones listed in our roadmap.
- This way, new users **discover eCash naturally** — not through promotion, but through real, useful experiences.

Main Mission:

“Connecting quality app experiences with real eCash adoption through NFT Open Access.”

NFToa’s Contribution to the eCash Ecosystem

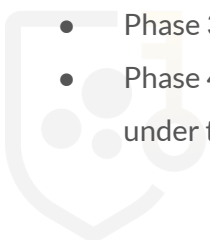

NFToa has directly contributed to the eCash ecosystem through the **integration of the NFToa protocol into Cashtab**, along with **official documentation in the Bitcoin ABC monorepo**, approved after a rigorous technical review. This milestone ensures NFTs can securely and efficiently interact with eCash wallets — establishing a strong foundation for future NFToa-based applications, beginning with **Gaudio** as the pioneering project.

Roadmap

NFToa maintains a publicly available roadmap at <https://nftoa.com/pages/roadmap.html>.

Key roadmap highlights:

- Phase 1: Initial NFToa protocol integration into Cashtab and documentation in Bitcoin ABC monorepo 
- Phase 2: Launch of the first application (Gaudio) on the Play Store 
- Phase 3: Expansion to App Store for iOS users 
- Phase 4: NFT Open Access ecosystem — expanding connections with other applications under the Gaexe Network.

Request & Closing Statement

Through this proposal, NFToa respectfully requests **USD 198** to cover the App Store developer fees for two years.

We also welcome any **additional recognition or grant** the GNC eCash team may wish to extend in appreciation of NFToa's ongoing mission to expand eCash adoption worldwide.

Any support received will be fully dedicated to sustaining this mission — bringing eCash into the hands of more people through practical, enjoyable applications that make blockchain utility feel real.

Best Regards

Founder NFToa
